

IP Telephony

Package for Mid-Size Companies

IP Telephony is already becoming the de-facto standard for new deployments of enterprise telephony. For smaller deployments, the cost of the IP PBX is often prohibitive. This issue is addressed by the IPTel.net.sg service which is an IP Centrex solution powered by a hosted Cisco CallManager cluster. This offers full IP Telephony functionality without the associated high cost of purchasing an IP PBX.

The IPTel.net.sg service offers:

- High Quality Digital Voice
- Direct Inward Dial (DID) Numbers to every phone
- Caller ID
- Call Forwarding (All / Busy / No Answer)
- Call Transfer
- Call Waiting with Caller ID Presentation of 2nd Call
- Conferencing
- Voice-Mail
- Premium IDD Voice Quality
- Comprehensive Call Detail Reporting
- ... And much more, see <http://www.iptel.net.sg/features.html> for details.

Premium Bundle Package at **\$6,995** (\$7,344.75 w/GST) includes:
